DETAILED ACTION

Applicant's cancellation of claims 1-84 and the addition of new claims 85-104, in the paper of 2/20/2004, is acknowledged. Claims 85-104 are at issue and present for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 87, 88, 103, drawn to a method for regulating mammalian hair growth comprising increasing heparanase activity, classified in class 424, subclass 94.5.
- II. Claims 91, 92, 104, drawn to a method for regulating mammalian hair growth comprising decreasing heparanase activity, classified in class 514, subclass 789.

Applicants are further required to elect one of the following products for use in the above elected methods:

- A). heparanase;
- B). heparanase inhibitor;
- c). heparanase antisense nucleic acid.

Applicants are further required to elect one of the following SEQ ID NOs for use in the above elected methods:

- D). SEQ ID NO: 10;
- E). SEQ ID NO: 14;
- F). SEQ ID NO: 44..

Claims 85, 86, 89, 93, 94-102 link(s) inventions I and II and inventions A-F. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 85, 86, 89, 93, 94-102. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104. Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim(s) including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1652

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and II each comprise different steps, use different products and have different results.

Inventions A-C are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups A-C are drawn to chemically unrelated structures capable of separate manufacture, use and effect.

Inventions D-F are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups D-F are drawn to different chemically sequences capable of separate manufacture, use and effect.

Because these inventions are distinct for the reasons given above and the search required for Groups I and II and Groups A-F is not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
